

# Kusabi® 300 SC FUNGICIDE

## Reliable chemistry for powdery mildew programs

**Kusabi contains 300 g/L pyriofenone (MOA Group 50)**

### Tank Mixing and Compatibilities

Kusabi® 300 SC is a suspension concentrate formulation registered for the control of powdery mildew in grapes and cucurbits.

Kusabi has been tested in the field in a range of two-way mixtures that include many products commonly used in grapes and cucurbits.

Field trials have been conducted under Australian conditions to evaluate the crop safety of mixtures and the impact of the mixing partner on Kusabi efficacy.

Results are summarised in the table below, and must be read in conjunction with the notes on page 2.

### Please Note:

- Kusabi has been tested for compatibility in Australia with only the brand names listed in the table on the previous pages, and with formulations of each product available. Environmental conditions and product formulations can influence crop safety and may impact the result under local conditions, regardless of the findings presented herein. Hence, this information should be treated as a guide only.
- It is essential that growers read the labels of potential tank mix products thoroughly for any use restrictions that may apply, and conduct their own small scale trials prior to mixing and applying commercial quantities.
- It is strongly recommended that no more than one product is tank mixed with Kusabi.
