

Surround[®] WP

Crop Protectant

PROTECTION YOU CAN SEE. PERFORMANCE YOU CAN TRUST

A Grower's Perspective

"We are heading into our 5th season (2019/20) of using Surround and have found we are continually gaining better fruit colour and increased volumes. The general health of the vine is a lot better, as the Surround is preventing sunburn which can easily cause up to 30% loss in production. The fruit quality in the vines has been exceptionally high, considering the extreme temperatures we experienced over the past few seasons and we have seen our picking dates move forward nearly a month from the first week in March to the first week in February.

Every year we are treating more and more varieties with Surround. Riesling is a variety susceptible to sunburn. Durif is another variety which doesn't have a huge canopy and we also treat Grenache and Malbec varieties and have had great results. We're finding we are getting a lot better coverage using 2.5 kg/100 L water and travelling up and back in two passes over the vines, and this means better protection."
