5. FIREFIGHTING MEASURES

Suitable Extinguishing Equipment: Use firefighting media appropriate for combustibles involved in the fire.
Specific Hazards Arising from the Chemical: Thermal decomposition or combustion may generate irritating and highly toxic fumes.
Special Protective Equipment and Precautions for Firefighters: Full protective clothing and self-contained positive pressure breathing apparatus should be worn. Evacuate area of all unnecessary personnel and fight fire from a safe distance upwind. Contain contaminated water/firefighting water; do not allow to enter drains or waterways. Foam or dry chemical fire extinguishing systems are preferred to prevent environmental damage from excessive water runoff.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures: Isolate area and keep unnecessary and unprotected personnel from entering. Wear suitable personal protective clothing and equipment as described in Section 8 of this document. Ensure adequate ventilation.
Environmental Precautions: Contain spillage and minimise spread. Dig up heavily contaminated soil and collect in containers for disposal. Keep out of drains, sewers, ditches and water ways. Do NOT contaminate water when disposing of rinse waters.
Methods and Materials for Containment and Cleaning Up: Avoid creating dust during cleanup. Sweep, scoop or shovel spilled material and place into suitable closed containers for reuse or disposal. After decontamination, spill area can be washed with water. Collect washwater for approved disposal. Place leaking containers in oversize leakproof drums for transport.
7. HANDLING AND STORAGE
