6. ACCIDENTAL RELEASE MEASURES

Emergency Procedures:	In case of spillage it is important to take all steps necessary to: <ul style="list-style-type: none">• Avoid eye and skin contact.• Avoid contamination of waterways.
Methods and Materials for Containment and Clean Up Procedures:	Wear full length protective clothing, boots and breathing apparatus. Prevent spill from entering drains, sewers or any body of water. Contain and absorb with sand, earth or inert absorbent. Scoop or shovel into sealable containers for disposal in accordance with applicable local, state and federal regulations. Decontaminate area with soap and minimal water.

7. HANDLING AND STORAGE

Precautions for Safe Handling:	Avoid contact with eyes and skin. Avoid breathing vapour/mist. Use with adequate ventilation. If inhalation risk exists, wear organic vapour respirator meeting the requirements of AS/NZ 1715 and AS/NZ 1716.
Conditions for Safe Storage, including any Incompatibilities:	Store in tightly sealed original containers in a cool, dry well-ventilated area out of direct sunlight. Store in a locked room away from children, authorized persons, animals, food, feedstuffs, seed and fertilisers. Do not use containers for any other purpose. 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

National Exposure Standards: No occupational exposure standards have been established for the product. The supplier recommended hygiene standard for some of the ingredients:

	TWA		STEL		NOTICES
	ppm	mg/m ³	ppm	mg/m ³	
Methylisobutyl-ketone	50	205	75	307	
n-Butylalcohol	50	152	Peak	limit	Sk
Pirimiphos-methyl	-	3	-	-	Sk

TWA = the time weighted average airborne concentrations over a eight-hour working day, for a five-day working week over an entire working life. STEL = Short Term Exposure Limit – the average airborne concentration over a 15 minute period which should not be exceeded at any time during a normal 8 hour work day. Peak Limit – a ceiling concentration which should not be exceeded over a measurement period which should be as short as possible but not exceeding 15 minutes. "Sk Notice" – absorption through the skin may be a significant source of exposure. The exposure standard is invalid if such contact should occur.

Biological Limit Values: No biological limit allocated.

Engineering Controls: Ensure adequate ventilation. Ensure air concentrations are controlled below quoted hygiene standards.

Personal Protective Equipment (PPE):

- Eyes:* Face shield.
- Clothing:* Cotton overalls.
- Gloves:* Elbow length impervious gloves.
- Respiratory:* If inhalation risk, use an organic vapour respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716.
