

POISON

KEEP OUT OF REACH OF CHILDREN

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

from AgNova

ACTIVE CONSTITUENT: 0.05 g/kg FLOCOUMAFEN

READY TO USE BAIT – KILLS IN A SINGLE FEED

*Controls rats and mice in and around industrial, commercial,
agricultural and domestic buildings.*

Controls rats and mice resistant to warfarin.

Net Contents: 8kg

GENERAL INFORMATION

STORM Secure can be used both indoors and outdoors. Rats and mice resistant to warfarin are controlled and no prebaiting is required. A lethal dose is readily consumed in a single feed but death may not occur for up to seven days. Do NOT place bait on or near exposed food or food utensils, food preparation areas or food storage areas.

DIRECTIONS FOR USE

RESTRAINTS:

Do NOT exceed 3 m between bait stations for mice, or 9 m for rats. Do NOT place baits in the open.

Situations.

For use in and around industrial, commercial, agricultural and domestic buildings.

Rats: Select suitable bait locations, such as within active rat holes, along runs and under rubbish. Try to establish a barrier of bait locations between living and feeding areas. Secure 3 or 4 STORM Secure blocks at each bait location on wire or nails, or inside rat bait boxes. Place 1 or 2 baits in each rat hole. Inspect the bait locations after 3 days and select new locations where there has been no take. Inspect again 4 days later and replace eaten blocks. Repeat bait station inspections at 7 day intervals, replacing fresh blocks only when baits have been eaten, until all signs of rat activity have disappeared. Normally only 3 to 4 baiting rounds (pulses) are required.

Mice: Mice have very limited home ranges and do not need to drink. They are more difficult to control than rats due to more erratic feeding patterns. Therefore selection of bait locations is even more important. Secure 1 or 2 STORM Secure blocks on wire or nails, or inside mouse bait boxes 2 metres apart in areas where activity is obvious, particularly where droppings are seen. In domestic premises, secure 1 to 2 blocks on wire or nails or in mouse bait boxes, in sheltered positions, inaccessible to children and pets, where mice are active such as under flooring, inside ceiling cavities, along pipe runs and conduits and behind skirting boards, furniture and appliances. Inspect bait locations and replace blocks as for rats until all signs of mouse activity have disappeared.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Baits must only be placed in areas frequented by the target pests. Do NOT place baits in areas accessible to domestic animals, children, pets and wildlife. Do NOT place baits in areas liable to flooding. Alternative food sources should be removed or reduced as much as possible.

PROTECTION OF LIVESTOCK, WILDLIFE, FISH, CRUSTACEANS AND OTHERS

This bait is hazardous to pigs, cats, dogs, poultry, birds and wildlife. Do NOT place baits in locations which are accessible to other animals or birds. Do NOT contaminate ponds, streams, rivers or waterways with the bait or its used containers.

The product is restricted to use in and around buildings (within 2 m) or in enclosed spaces, e.g. drains.

In enclosed roof spaces and areas where possums and other non-target animals frequent, baits should be secured inside proper bait stations or plastic jars or plastic tubes.

The use of this product for the control of protected native rodents requires permission from wildlife authorities.

STORAGE AND DISPOSAL, PROTECTION OF OTHERS

Store in the closed original container in a safe place. Containers which have held bait should not be used for any other purpose. Pest Control Operators should dispose of empty containers, used bait stations and unused or untaken bait by burying in an approved dump. In a domestic situation, minimise the presence of excess baits. Where unused baits are in good condition, return to original container for reuse. For empty containers, damaged or unwanted baits, wrap securely and dispose of in household refuse bin. Look for dead rats or mice and burn or bury them. Do NOT place dead rats or mice in refuse bins or rubbish tips.

Ensure baits are removed when rodent activity has ceased.

SAFETY DIRECTIONS

Poisonous if swallowed. Avoid contact with eyes and skin. When preparing product for use, wear elbow-length PVC gloves. If product on skin, immediately wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Telephone 13 11 26 Australia-wide. Vitamin K1 (phytomenadione) is antidotal.

NOTE TO DOCTOR

The active constituent flocoufamen is an indirect blood anticoagulant. Ingestion of a relatively large quantity of bait would be required before a toxic effect is expected. In general, an increased tendency to bleed could indicate poisoning. Vitamin K1 (phytomenadione) is antidotal. In cases of suspected poisoning, determine prothrombin time not less than 18 hours after consumption. If elevation has occurred, administer Vitamin K1, intravenously in divided doses, 40mg for adults, 20 mg for children daily. Treatment may be required daily for several weeks. Withdraw antidote with care and monitor prothrombin times continuously for 4 days or more after such withdrawal.

DOMESTIC ANIMAL POISONING

In cases of accidental poisoning by STORM Secure consult a veterinarian who will advise of suitable Vitamin K1 antidote therapy.

MSDS

Additional information is listed in the Material Safety Data Sheet.

CONDITIONS OF SALE

AgNova Technologies Pty. Ltd. shall not be liable for any consequential or other loss or damage relating to the supply or subsequent handling or use of this product, unless such liability by law cannot be lawfully excluded or limited. All warranties, conditions or rights implied by statute or other law which may be lawfully excluded are so excluded. Where the liability of AgNova Technologies Pty. Ltd. for breach of any such statutory warranties and conditions cannot be lawfully excluded but may be limited to it re-supplying the product or an equivalent product or the cost of a product or an equivalent product, then the liability of AgNova Technologies Pty. Ltd. for any breach of such statutory warranty or condition is so limited.
