

Ambush[®] is back!!

Tried and Trusted Insect Control on a Wide Range of Crops

- AMBUSH is highly effective on a wide range of chewing and sucking pests on many crops.
- Excellent value for money.
- Short withholding period so spraying can be carried out to within a few days of harvest.
- Very good crop safety.
- Low odour when mixed.
- Excellent compatibility with other insecticides and fungicides.
- Use AMBUSH in a program with other chemical groups to manage resistance. Follow Group 3A resistance strategies.
