

Calcium

A high quality suspension concentrate formulated for optimum calcium uptake. Wuxal® Calcium is designed to prevent or control calcium deficiencies of fruit and vegetable crops. Wuxal® Calcium also provides supplementary nutrition of nitrogen, magnesium and the chelated cationic micronutrients required to achieve optimal plant growth, increased yield and improved quality.

- Highly concentrated foliar fertiliser with a significantly higher calcium uptake efficiency than the single calcium salt sprays.
- Has bio-effective additives for weather independent uptake of calcium and all other nutrients.
- Has a very high crop safety and none of the disadvantages of the single calcium sprays such as phytotoxicity at certain stages of growth, temperature dependency or unsatisfactory compatibility with pesticides.
- Is compatible with most commonly used fungicides and insecticides except lime sulphur & Bordeaux mixtures.
- Can be applied with high and low volume spraying equipment.

✓ **Apples** - Bitter pit, water core, lenticel and internal breakdown
Start bitter pit programs early with Wuxal® Calcium from petal fall / early fruit set

✓ **Mangoes** - Soft nose
✓ **Brassicas** - Internal browning, tip burn

✓ **Tomatoes, Capsicum & Peppers** - Blossom end rot

✓ **Lettuce** - Tipburn

✓ **Carrot** - Cavity spot

✓ **Cherry** - Cracking

Concentrated suspension fertiliser containing:

Ca (Calcium)	172 g/L	EDTA complex :	
N (Nitrogen)	160 g/L	Cu (Copper)	640 mg/L
Mg (Magnesium)	18 g/L	Fe (Iron)	800 mg/L
B (Boron)	800 mg/L	Mn (Manganese)	1600 mg/L
Mo (Molybdenum)	16 mg/L	Zn (Zinc)	320 mg/L

Pack size 10 Litre bucket - pH is approximately 6.5
