

# WUXAL®

# Calcium

## Safe and effective foliar nutrient delivery

**A high quality formulation that delivers optimum calcium uptake. Wuxal® Calcium is designed to prevent or control calcium deficiencies of fruit and vegetable crops. Wuxal Calcium also provides supplementary nutrition of nitrogen, magnesium and the chelated cationic micronutrients required to optimise plant growth, increase yield potential and improve quality.**

### Wuxal Calcium:

- Is a highly concentrated foliar fertiliser with a significantly higher calcium uptake efficiency than the single calcium salt sprays. This reduces freight and handling, and improves application efficiency.
- Contains stickers, a surfactant system, humectants and anti-evaporants. This improves application efficiency and plant uptake, reducing wastage and improving plant performance.
- Has superior crop safety compared to single salt calcium sprays. Ordinary single salt calcium sprays may cause phytotoxicity.
- Has a pH of approximately 6.5. Its buffering capability can make mixing easier and cheaper. Expensive buffering solutions may not be needed with Wuxal Calcium and it is compatible with most commonly used fungicides and insecticides (except lime sulphur and Bordeaux mixtures.)
- Can be applied with high or low volume spraying equipment.
- Available in 10 Litre drums

- ✓ **Apples** – Bitter pit, water core, lenticel and internal breakdown  
*Start bitter pit programs early with Wuxal Calcium from petal fall/early fruit set*
- ✓ **Mangoes** – Soft nose
- ✓ **Brassicas** – Internal browning, tip burn
- ✓ **Tomatoes, Capsicum & Peppers** – Blossom end rot
- ✓ **Lettuce** – Tip burn
- ✓ **Carrot** – Cavity spot
- ✓ **Cherry** – Cracking

Concentrated suspension fertiliser containing:

<b>Ca</b> (Calcium)	172 g/L	EDTA complex:	
<b>N</b> (Nitrogen)	160 g/L	<b>Cu</b> (Copper)	640 mg/L
<b>Mg</b> (Magnesium)	18 g/L	<b>Fe</b> (Iron)	800 mg/L
<b>B</b> (Boron)	800 mg/L	<b>Mn</b> (Manganese)	1600 mg/L
<b>Mo</b> (Molybdenum)	16 mg/L	<b>Zn</b> (Zinc)	320 mg/L
