**MIGIWA contains 218 g/L ipflufenquin (MOA Group 52)**

## Unique chemistry for various fungal disease programs

### Tank Mixing and Compatibilities

MIGIWA<sup>®</sup> KINOPROL<sup>®</sup> ACTIVE is a suspension concentrate formulation registered for the control of grey mould caused by *Botrytis cinerea* in strawberries and wine grapes, and black spot and powdery mildew in apples.

MIGIWA has been tested in the field in a range of two-way mixtures that include many products commonly used in strawberries, wine grapes and apples.

Field trials have been conducted under Australian conditions to evaluate the crop safety of mixtures and the impact of the mixing partner on MIGIWA efficacy.

Results are summarised in the table below, and must be read in conjunction with the notes on page 4.

STRAWBERRIES				
TANK MIX PRODUCT	CROP	PHYSICAL COMPATIBILITY	CROP SAFETY	EFFECT ON MIGIWA EFFICACY
STRAWBERRY Fungicides				
Flint* 500 WDG	Red Rhapsody, Monterey, Amesti	✓	✓	No effect

<b>APPLES Nutrition and harvest aids</b>				
Wuxal* Ca	Pink Lady & Gala	✓	✓	No effect
<b>APPLES PGRs</b>				
Regalis* 100 WDG	Envy	✓	✓	No effect

\*Denotes trademark or registered trademark. It is essential that growers read the labels of potential tank mix products thoroughly for any use restrictions that may apply, and conduct their own small scale trials prior to mixing and applying commercial quantities.

## Please Note:

- MIGIWA has been tested for compatibility in Australia with only the brand names listed in the table on the previous pages, and with formulations of each product available. Environmental conditions and product formulations can influence crop safety and may impact the result under local conditions, regardless of the findings presented herein. Hence, this information should be treated as a guide only.
- It is essential that growers read the labels of potential tank mix products thoroughly for any use restrictions that may apply, and conduct their own small scale trials prior to mixing and applying commercial quantities.
- It is strongly recommended that no more than one product is tank mixed with MIGIWA.

## Migiwa Features

- Excellent and reliable grey mould control in strawberries
- Excellent and reliable Botrytis bunch rot control in wine grapes
- Excellent and reliable black spot and powdery mildew control in apples
- Group 52 fungicide – New mode of action
- Suitable for IPM
- Superb crop safety
- Low use rates
- Wide compatibility range

Information and data referred to herein were generated using products and rates that were registered at the time, may include extracts from the product label and does not constitute the complete directions for use. Always read and follow product labels.

AgNova Technologies Pty Ltd shall not be liable for any consequential or other loss or damage relating to the supply or subsequent handling or use of this product, unless such liability by law cannot be lawfully excluded or limited. All warranties, conditions or rights implied by statute or other law which may be lawfully excluded are so excluded. Where the liability of AgNova Technologies Pty Ltd for breach of any such statutory warranties and conditions cannot be lawfully excluded but may be limited to it re-supplying the product or an equivalent product or the cost of a product or an equivalent product, then the liability of AgNova Technologies Pty Ltd for any breach of such statutory warranty or condition is so limited.
